How You Can Keep Cool In a Glass Room....

Even in the recent heatwave, our revolutionary multi-coat Wonderglass will keep out the intense heat and enable you to use your Four Seasons Conservatory All-Year-Round!

Across the USA throughout Europe and in Countries as diverse as Iceland and Saudi Arabia they have been transforming their homes, as well as their Hotels, Rest Homes and Restaurants, by adopting a glass conservatory extension that can be truly used in comfort all year round. Four Seasons is the worlds largest Conservatory Manufacturer and is available now in the UK through Room Outside Conservatories in Quarry Lane, Chichester. The word is out! Room Outside have now sold over 100 of the wonderglass structures and if you wanted to know just how good they are, then just talk to one of our Four Seasons customers to find out how truly amazing the product really is!

Too Hot!

We all know how hot and uncomfortable a conservatory can get in the summer months, and how difficult it can be to keep warm in the depths of winter. But now a comprehensive range of revolutionary clear glass sun room's are obtainable, with the thermal properties of a cavity wall, and a totally unique and astounding protection from the sun's summer heat. If previously you had been put off the idea of utilising a conservatory style glass extension for use 12 months of the year in all extremes of weather, now you can think again! The only limit is your own imagination.

Don't be fobbed off with claims about low-e or Pilkington K glass as these are primarily designed to keep the heat IN and not to reflect heat away. Our tunnel of heat demonstration in our Quarry Lane showroom will clearly show you the difference!

We all know how hot and uncomfortable a conservatory can get in the summer months, and how difficult it can be to keep warm in the depths of winter. That's just not the case with the Four Seasons range! A well-designed, comfortably temperate Four Seasons conservatory will add enjoyment, and make your home more desirable when you come to sell. The opposite is true for those who take the cheaper option! The old adage that you get what you pay for was never truer, than when buying a conservatory.

Beautiful Oak Interior

Our new Four Seasons wonderglass System 9 with Oak timber internally and the maintenance free aluminium exterior is yet another product option, and will shortly be featured in a BBC garden make-over TV programme, and very shortly we will be building a brand new example here at our Quarry Lane showroom.
